Rainscreen cladding system in natural slate

Let your creativity run wild!

WHAT IS CUPACLAD DESIGN?

CUPACLAD Design opens up a world of possibilities for the design of ventilated facades by proposing new shapes and combinations in natural slate.

It is proof that CUPACLAD® has become the best solution for the latest architectural trends.

There are therefore limitless designs and styles for slate facades!

CUPACLAD Design embrace two objectives:

Design Assistance Service

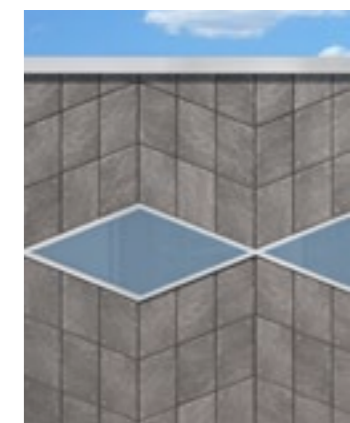

CUPACLAD Design engineers are at your disposal: they will make every effort to adapt your slate solution to the real constraints of construction site.

Creative laboratory

From the most daring forms to the most complex, nothing stops our designers. All their proposals are technically reliable and achievable.

Even better... Do you have an idea and need a little help to make it sprout? They will be there for you.

“A design office at your disposal ready to create, with you, leading-edge projects.”

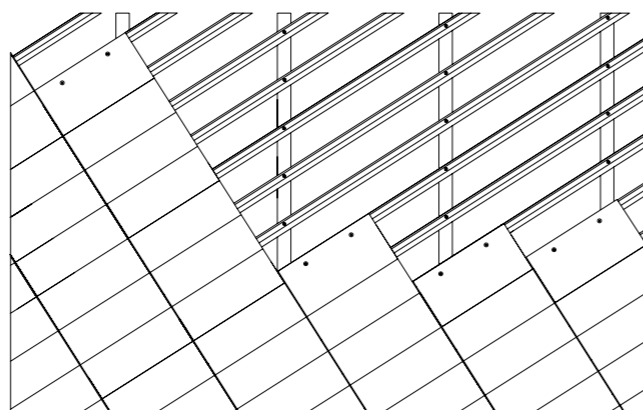

DIAGONAL

A DESIGN CATCHING EVERYONE'S EYE

This design has a unique dynamic style based on geometric simple shapes giving a touch of exclusivity.

It also allows to benefit from the efficiency and the durability of CUPACLAD® rainscreen cladding systems.

The DIAGONAL system brings an elegant and spontaneous vibrant character full of personality.

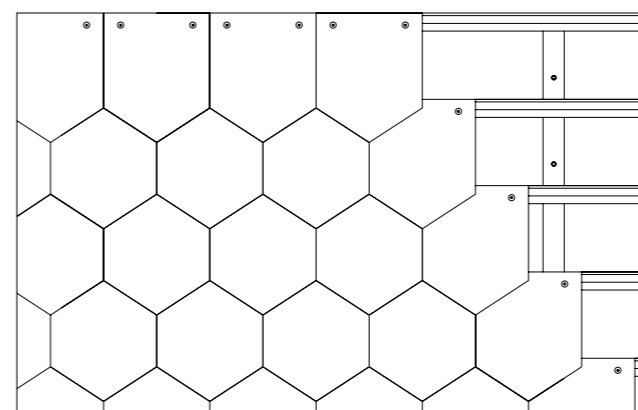

HONEYCOMB

HEXAGONS IN ARCHITECTURE: AN IDEA INSPIRED BY NATURE

Hexagons are trendy! They have always been present in nature around us: we find them on the surface of a turtle shell, on bee hives and even on snowflakes!

Hexes have now become a source of inspiration in contemporary architectural design.

The logo for CUPACLAD, featuring a stylized 'C' icon followed by the company name in a bold, sans-serif font.
